Capacity evidence

Do not add these claims together. IT load, facility power, grid connection and unspecified power are different measurements. Cumulative and incremental scopes remain separate.

Measurement	Development scope	Evidence / accounting
31 MW IT load	Campus full-build IT capacity, four buildings operational · cumulative	[1] reported · 2026-09-11 Excluded from totals. Research retrieval date, not a commissioning or measurement date. Design/full-build capacity is not evidence that all MW are commissioned. Excluded from sums pending capacity and hierarchy review.

Research gaps

- Verified block-level property coordinates
- Latest unobstructed property photo and reuse rights
- Legal property ownership and ownership history
- Actual energized/occupied power and phased commissioning breakdown
- Private tenants and undisclosed technical details
- Individual building capacities and phase-to-building allocation; campus total must not be assigned to each building
- Verified full street address
- Independent block-level coordinate confirmation; approving a candidate does not prove survey accuracy
