# STT Bangkok 1

## 23 MW • IT load

Reported design capacity; energized and occupied load not established

Development status: operational

Current specification supersedes historical 20 MW launch design.

Last researched: 2026-09-11 | Last verified: Not independently verified

Tracked dataset only. Unknown values are not zero. Evidence dates and measurement definitions must be considered when comparing sites.

| Metro area      | Greater Bangkok [1]                                                                                                                                                                                                 |
| City / locality | Bangkok [1]                                                                                                                                                                                                         |
| Address         | 1 Soi Ramkhamhaeng 28, Hua Mak, Bang Kapi, Bangkok 10240 [1]                                                                                                                                                        |
| Coordinates     | 13.756468, 100.613932 · approximate precision. Conflicting candidate: PeeringDB point differs from the nearby Bangkok 2 campus point by about 2 km. Reconcile against the operator street address before accepting. |
| Parent          | Not assigned                                                                                                                                                                                                        |

## Capacity evidence

Do not add these claims together. IT load, facility power, grid connection and unspecified power are different measurements. Cumulative and incremental scopes remain separate.

| Measurement      | Development scope                                                                              | Evidence / accounting                                                                                                                                                                                                                                                                                                    |
|------------------|------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 23 MW<br>IT load | Reported design capacity; energized and occupied load not established operational · cumulative | [1] reported · 2026-09-11<br>Excluded from totals. Research retrieval date, not a commissioning or measurement date. Design/full-build capacity is not evidence that all MW are commissioned. Excluded from sums pending capacity and hierarchy review. Current specification supersedes historical 20 MW launch design. |

## Development timeline

No dated milestones established.

## Disclosed specifications

No additional specifications established.

## Research gaps

- Verified block-level property coordinates
- Latest unobstructed property photo and reuse rights
- Legal property ownership and ownership history
- Actual energized/occupied power and phased commissioning breakdown
- Private tenants and undisclosed technical details
- Independent block-level coordinate confirmation; approving a candidate does not prove survey accuracy
