Capacity evidence

Do not add these claims together. IT load, facility power, grid connection and unspecified power are different measurements. Cumulative and incremental scopes remain separate.

Measurement	Development scope	Evidence / accounting
≥100 MW IT load	Advertised full-build/design capacity; commissioned share unconfirmed planned · cumulative	[1] reported · 2026-09-11 Excluded from totals. Retrieval date, not measurement date. Design ceiling is not proof of delivered/occupied load. Excluded from aggregates pending reconciliation. Current 100+ MW plan targets Q3 2027. Older 69 MW/Q3 2026 plan retained as historical scope; completion not established.
69 MW IT load	Historical/different-scope design claim; not additive planned · cumulative	[3] reported · 2026-09-11 Excluded from totals. Retrieval date, not measurement date. Design ceiling is not proof of delivered/occupied load. Excluded from aggregates pending reconciliation. Historical 69 MW plan and Q3 2026 target; replaced by current 100+ MW/Q3 2027 plan, not additional capacity.

No additional specifications established.

Research gaps

- Independently verified block-level coordinates
- Latest property photo and reuse rights
- Legal owner and ownership history
- Commissioned MW versus design capacity
- Facility/phase capacity accounting reconciliation
