STACK Infrastructure JHB01 campus

Unknown MW · Total facility power not established

See capacity evidence for reported claims.

Development status: under construction

STACK Johor campus with two planned facilities. Its initial announcement described 220 MW; the current APAC site lists 216 MW. Both disclosures remain available for review without adding them together.

Last researched: 2026-09-11 | Last verified: Not independently verified

Tracked dataset only. Unknown values are not zero. Evidence dates and measurement definitions must be considered when comparing sites.

Site photographs

No approved property photo available.

Site profile

Field	Published information
Operator	STACK Infrastructure [1] [2] [3]
Owner	Unknown
Business model	unknown
Scale	unknown
Country	Malaysia [1]
State / region	Johor [1]
Metro area	Johor Bahru [1]
City / locality	Gelang Patah [1]
Address	Jalan SiLC 1/5, Gelang Patah [1]
Coordinates	1.4700909, 103.5888088 · approximate precision. Named Google Maps site POI matched to facility identity and locality; approximate property location, not independently verified building boundary or entrance.
Parent	Not assigned

Capacity evidence

Do not add these claims together. IT load, facility power, grid connection and unspecified power are different measurements. Cumulative and incremental scopes remain separate.

Measurement	Development scope	Evidence / accounting
220 MW Unspecified power	Advertised full-build/design capacity; commissioned share unconfirmed planned · unclear	[1] reported · 2026-09-11 Excluded from totals. Retrieval date, not measurement date. Design ceiling is not proof of delivered/occupied load. Excluded from aggregates pending reconciliation. Campus design covers two buildings; do not repeat campus capacity for JHB01A/JHB01B. Historical/current design claims retained without selecting an additive total.
216 MW Unspecified power	Current operator market listing for single Johor campus planned · unclear	[2] reported · 2026-09-11 Excluded from totals. Source-reported design/announced capacity, not measured consumption. Excluded from aggregation pending reconciliation. Historical/current design claims retained without selecting an additive total.

Development timeline

No dated milestones established.

Disclosed specifications

Research clarification · 2026-09-11: Current 216 MW listing differs from January 2025 announcement of 220 MW. Both claims retained, neither is an additive expansion.

Source-backed research proposal; publication requires review. [2]

Research gaps

- Independently verified block-level coordinates
- Latest property photo and reuse rights
- Legal owner and ownership history
- Commissioned MW versus design capacity
- Facility/phase capacity accounting reconciliation
