Empyrion MY1 Nusajaya campus

200 MW • IT load

Ultimate MY1 campus IT design; operator also gives 100–200 MW range

Development status: planned

Five 40 MW buildings form a 200 MW campus. September 2026 energization/Q4 2026 first-building dates are targets only.

Last researched: 2026-09-11 | Last verified: Not independently verified

Tracked dataset only. Unknown values are not zero. Evidence dates and measurement definitions must be considered when comparing sites.

Site photographs

No approved property photo available.

Site profile

Field	Published information
Operator	Empyrion Digital [1] [2]
Owner	Unknown
Business model	unknown
Scale	unknown
Country	Malaysia [1]
State / region	Johor [1]
Metro area	Johor Bahru [1]
City / locality	Gelang Patah [1]
Address	i-TechValley, Persiaran Bioteknologi, SiLC [1]
Coordinates	Unknown · unknown precision. Property coordinate not established; no city centroid substituted.
Parent	Not assigned

Capacity evidence

Do not add these claims together. IT load, facility power, grid connection and unspecified power are different measurements. Cumulative and incremental scopes remain separate.

Measurement	Development scope	Evidence / accounting
200 MW Unspecified power	Advertised full-build/design capacity; commissioned share unconfirmed planned · cumulative	[1] reported · 2026-09-11 Excluded from totals. Retrieval date, not measurement date. Design ceiling is not proof of delivered/occupied load. Excluded from aggregates pending reconciliation. Five 40 MW buildings form a 200 MW campus. September 2026 energization/Q4 2026 first-building dates are targets only.
200 MW IT load	Ultimate MY1 campus IT design; operator also gives 100–200 MW range planned · cumulative	[2] reported · 2026-09-11 Excluded from totals. Source-reported design/announced capacity, not measured consumption. Excluded from aggregation pending reconciliation.

Development timeline

No dated milestones established.

Disclosed specifications

Research clarification · 2026-09-11: 200 MW is the upper end of the disclosed IT design range; 40 MW-per-building statement is not multiplied into extra capacity.

Source-backed research proposal; publication requires review. [2]

Research gaps

- Independently verified block-level coordinates
- Latest property photo and reuse rights
- Legal owner and ownership history
- Commissioned MW versus design capacity
- Facility/phase capacity accounting reconciliation
