Capacity evidence

Do not add these claims together. IT load, facility power, grid connection and unspecified power are different measurements. Cumulative and incremental scopes remain separate.

Measurement	Development scope	Evidence / accounting
60 MW Unspecified power	Advertised full-build/design capacity; commissioned share unconfirmed planned · cumulative	[1] reported · 2026-09-11 Excluded from totals. Retrieval date, not measurement date. Design ceiling is not proof of delivered/occupied load. Excluded from aggregates pending reconciliation. Historical operator brochure: 20 MW distribution at initial operations, scalable to 60 MW. Current delivered amount needs verification.

Development timeline

No dated milestones established.

Disclosed specifications

Research clarification · 2026-09-11: Current trading identity is Data Zone Thailand; SUPERNAP Thailand retained as former name. Exact rebranding and legal-transfer dates remain unknown.

Source-backed research proposal; publication requires review. [3]

Research gaps

- Independently verified block-level coordinates
- Latest property photo and reuse rights
- Legal owner and ownership history
- Commissioned MW versus design capacity
- Facility/phase capacity accounting reconciliation
